

# Deniz Can Özder

## Full Stack Developer

I am a highly motivated, solution-oriented, and growth-driven Full Stack Developer candidate. I have hands-on experience building responsive, user-friendly interfaces using modern technologies such as HTML5, CSS3, JavaScript, and React. I work efficiently with tools like Git, GitHub, and Vite, and I integrate various UI libraries into my projects when needed. In team projects, I have taken on leadership roles as a team lead, demonstrating my ability to manage responsibilities and coordinate effectively. With a strong eye for detail, a collaborative mindset, and a passion for continuous learning, I aim to deliver solutions that not only meet today's needs but also align with the evolving technologies of the future.

## Projects

### Cinemanialink [HTML, SASS, JS, REST API]

- Developed a fully responsive movie website as a Team Lead/Developer
- Conducted regular build error checks and monitored live page performance, ensuring a seamless user experience.
- Utilized external APIs to improve data-driven functionality and deliver a seamless user experience.

### Harvestlink [HTML, SASS]

- Developed a fully responsive cinema website as a Team Lead/Developer.
- Using pure HTML and CSS, we created a clean yet impactful project that stands out with its simplicity.

### BASIClink [HTML, CSS, JS]

- Created a clean and responsive landing page using only HTML and CSS.
- Focused on minimalist design principles to highlight clarity and structure.
- Applied semantic HTML for better accessibility and SEO optimization.
- Utilized modern CSS layout techniques including Flexbox and media queries.
- Designed with a mobile-first approach to ensure full responsiveness across devices.
- Built as a lightweight, fast-loading static project with no external dependencies.
- Showcased attention to detail in typography, spacing, and color harmony.

## Experience

### OSOCI

January 2022 - Present

#### System Administrator & Customer Specialist

- Identified over 185 bugs in a single day, significantly contributing to system stability.
- Took initiative to resolve several issues independently before reporting, accelerating the development process.
- Collaborated effectively with the software development team and assumed additional responsibilities beyond my core role.
- Delivered quick and practical solutions during critical situations, ensuring minimal disruption.
- Created clear and structured documentation to support team efficiency and knowledge continuity.
- Acted as a technical bridge between my team and the software engineers, facilitating seamless communication and understanding.

## Education

### Yıldız Teknik University

Bachelor's Degree in Physics

2022-2029

### IT School GoIT

Full-Stack Developer Program

2024-2025

### Adıgüzel MYO

Computer Programming

2018-2020
